

# Timeline of Hitachi's development of high-speed elevator technology

1920

Started elevator research at the Kameido Works (Tokyo)

1964

300 m/min elevator is delivered to Japan's first skyscraper building

1993

The world's first elevator with a speed of 810 m/min developed

2016

The ultra-high-speed elevators achieved the world's highest speed of 1,200 m/min

2017

The ultra-high-speed elevator reached the world's fastest speed of 1,260 m/min

300  
m/min
